FACSIMILE BROADCAST RECEIVER RCA Model FAX-2A

A fully Automatic Facsimile Receiver and Printer, mounted in an attractive walnut cabinet, complete and ready to operate, at a price far below its original cost. Consists of pre-tuned high fidelity radio receiver, facsimile printer amplifier, facsimile printing unit, and telechron time switch clock. Precise mechanism in facsimile printing unit, consisting of synchronous motor, worm and gear driven carbon and white paper feed and take-up, and printing head assembly, operating from impulses received from white and black amplifier tubes in printer amplifier. Has many possible uses in the laboratory. The printing unit utilizes carbon paper in contact with white paper as a recording medium. Complete with tubes and operating and service instructions, but less recording paper.

SHURE Magnetic Recording Head

High quality, wide response record cutter; ideal for use in home recording equipment. Standard replacement for thousands of magnetic cutters which are in service today, and with a few minor circuit changes, will replace crystal cutting heads and provide more lasting service. Designed to operate directly from voice coil winding of output transformer, with stiff moving, but highly sensitive recording element to permit cutting of practically all recording materials. Will match 4-8 ohm voice coil windings. No mounting brackets are provided, but tapped mounting holes facilitate re-use of brackets on unit to be replaced. Size 2 3/4" x 1 1/2" x 3/4" with needle screw and 4-inch flexible leads. Less stylus. Shpg. wt. 8 oz.

NO PRIORITIES REQUIRED!

Now you can again order long-scarce radio parts and equipment until recently available only to producers for war. At last you can make those delayed experiments, build that dreamed-of equipment—freely, fully and quickly.

NOW...Splendid Buys in Quality Items

Shelves in our CHICAGO and ATLANTA shipping-warehouses are generously stocked with almost every type of radio part and electronic equipment. Until now most of these were available only with priority ratings. Today they are yours . . . yes, thousands and thousands of items ready for immediate, overnight shipment. The pages of this special Supplement offer you

hundreds of them at low VICTORY CLEARANCE PRICES . . . prices that mean substantial savings. But we urge you to order them quickly, while our supplies last. You'll receive the prompt service which has made CONCORD the most dependable source from coast to coast for radio parts and electronic equipment.

**For More Complete Selections
See Our Former Catalog No. 345**

Use It For Items Not Listed Here

Only a very small part of our stock is listed in this supplement. Space does not permit us to show the thousands of other parts, the many other lines of equipment we have on hand, ready for instant shipment to you. Refer to your copy of our former Catalog No. 345 for anything you want that you do not find listed in this Supplement. Your orders will be given same-day attention.

In Preparation **A NEW COMPLETE CATALOG**

With the return of peace, we are hard at work on a new catalog. But we are not rushing headlong into preparing it. We are taking our time, to make it the first complete, comprehensive Catalog since V-Day. It will offer many items not available at any price during the war; it will show new, post-war developments; it will contain the last word in modern radio parts and electronic equipment. This historic Catalog will be mailed to you as soon as ready.

AMPLIFIERS

Due to lack of time and space we were unable to include our complete line of amplifiers and intercoms in this catalog supplement. A special circular illustrating and describing this line is yours for the asking. Write for it today.

ELECTROLYTIC CONDENSERS BY-PASS-TUBULAR CONDENSERS

AEROVOX Dry Electrolytics

These capacitors are hermetically sealed in a cylindrical aluminum can 2 3/4" high with a dia. of 1", with terminals secured in an insulating cover. They are equipped with clamp-type mounting rings to facilitate mounting in any position. Widely used in highest quality radio, communications, and electronic equipment of all types. 25mfd, 50 DCVV Max. Surge 75VDC.

NO PRIORITY NEEDED

ERIE Ceramicon Condensers

Erie ceramicon condensers are insulated in a sealed ceramic case and are of very stable capacity with a ceramic dielectric, having coated plates of pure silver fired on at a high temperature. These capacitors are designed with definite temperature coefficients, and as such provides a simple, efficient method for compensating for frequency drift in oscillator and I.F. components. They feature greater mechanical strength, more direct and uniform electrical paths, and better protection against humidity.

CENTRALAB Fixed Ceramic Capacitors

Extremely compact and stable capacitors, consisting of a thin wall ceramic tube, spacing two tubular silver plates, one inside and one outside the ceramic, and electroplated on the ceramic so that no mechanical movement to change the capacitance of the unit is possible. All are flash-tested at 1400 volts DC, with recommended working voltage of 500 volts DC. Power factor averages .05% with 1% the passing limit and does not increase with age. Aerovox series N-12. .05 mfd. 7500 VDC oil filled paper capacitor in aluminum can. Built to meet rugged requirements. Improved bakelite top, hermetically sealed. High voltage terminals mounted on low loss stand off insulators. This capacitor is particularly suitable for high voltage circuit applications such as in Television, cathode ray tube power supplies, high voltage rectifier circuits, or as high voltage by-pass condensers. Dimensions: Can height: 3¾", diameter, 2¼". Overall height including terminals, 4½". Terminals on 1½" centers. Vertical mounting type, less mounting clamp.

Filament Resistor Panel

Molded plastic panel $\frac{1}{4}$ " thick by $1\frac{1}{2} \times 10\frac{1}{4}$ " long with aluminum mounting brackets on each end. Has 20 .25 ohm coiled wire resistors connected in series, mounted on brass terminals at back of panel. Connections can be made to one or any combination of resistors by means of threaded connectors on panel which takes a standard 8-32 screw. Many uses can be found for this panel in laboratories or radio and electronic work. Resistor coils can be easily removed and panel used for other purposes if desired.

300 Watt Rheostat

Hardwick Hindle E-300 type Rheostat. Outstanding design features; Resistance wire wound over a solid porcelain core each turn being locked by vitreous enamel—large flat surface upon which contact brush rides, ceramic form mechanically fastened to cast aluminum base. With this rheostat exceptionally smooth, gradual, close control is assured, each turn of wire being a separate resistance stop. The E-300 is particularly adopted to applications such as motor speed control, generator field control, lamp dimming, electronic tube control, etc. Size: 6" dia. Approx. 2 1/8" deep, 1400 ohm 300 watts.

HOME RECORDING BLANKS RECORDISCS

The Yellow Label and Green Label Discs listed below are coated with a slow-burning compound which is approved by the Underwriters Laboratories. For all practical purposes this coating is substantially equal to Cellulose nitrate coating, and for home recording is more than adequate. Shavings are NON-INFLAMMABLE.

Yellow Label

Paper composition base especially selected for uniformity and flatness. Coated on both sides with slow-burning surface compounds.

Time Delay Relay

The function of this Time Delay Relay is to provide a fixed delay between the energizing of the timer and the opening or closure of an auxiliary circuit. It is specifically designed for use in radio, electronic or electrical apparatus, for the control of automatic machinery where rugged, accurate and simple timers are desirable. This

model consists of sturdy switch units actuated by pawls riding upon cams which are rotated to adjustable limits by a self starting, hysteresis type, synchronous motor. The contacts are coin silver, self wiping, and are rated to carry a 15 amp. non-inductive load. This model has two pole, normally open contacts, both set to close at 60 sec., plus or minus 3 sec., 115 V., 60 cycle motor and 115V, 60 cycle switch. It is adjustable from 2 to 60 seconds. The mechanism is mounted within a black, molded bakelite shell. Size: $3\frac{3}{4}$ " wide, 5" high, and $2\frac{1}{2}$ " deep overall. Mounting holes on $2\frac{1}{2}$ " x $3\frac{1}{2}$ " centers tapped for $\frac{3}{8}$ " screws. Housed in black enameled metal case.

BROWNING Signal Generator

The Browning type A-30 signal generator is an r-f signal generator covering the range of 22 mc. to 38 mc., with tuning dial calibrated in mc. Power output 0-5 volts. The A.F. oscillator in the unit may be adjusted to frequencies of from 900 c.p.s. to 1100 c.p.s. Modulation up to 80% may be obtained. This unit employs a 115 volt 60 cycle 55 watt power supply, and will supply the following types of output: (a) Continuous wave r-f (b) Amplitude modulated r-f (c) Audio frequency. The A.F. output impedance varies from 0 to 25,000 ohms; the r-f from 0 to 900 ohms. The r-f oscillator is a conventional Hartley, tuned by a condenser controlled by tuning dial on panel. The A.F. oscillator is a Wien Bridge type, set for 1000 c.p.s. and has potentiometer control in rear of chassis for adjusting frequency. Panel, in black wrinkle finish, contains on and off line switch, an R.F. and A.F. power level control, an R.F. tuning dial, and a MOD/UNMOD switch. Supplied with over 5 feet of line cord for 115 volt 60 cycle with two prong plug, an amphenol 80-C connector for R.F. output and pin jacks for A.F. output. Panel size 7" x 10". Unit mounted in ruggedly constructed oak wooden case, size, 17" wide, 9 1/4" high, and 9 3/4" deep, with removable cover and fitted with leather strap for carrying. Complete with 5 tubes: 6AC7 R.F. oscillator, 6AC7 Amplifier, 6SN7-GT A.F. oscillator, 5Y3-GT full wave rectifier, VR-150 voltage regulator. Variable Condensers

(A) 200 mmfd. condenser suitable for low powered multi-stage transmitters, etc. Plates all rounded and buffed, glass bead insulation, heavy metal frame. Condenser is equipped with $\frac{1}{4}$ " shaft extending $\frac{1}{4}$ " only, and fitted with a locking

sleeve and lever arm with screw to lock to frame which facilitates locking the condenser in any desired fixed position. A one-plate air padder with screwdriver adjustment is fixed to frame which provides capacity between the rotor and the edges of the stator plates, for very fine adjustments of capacity. Two mounting studs extending $\frac{1}{8}$ " from frame and tapped for 4-36 screws on $1\frac{1}{16}$ " centers. Overall size: $2\frac{1}{4}$ " wide, $2\frac{3}{16}$ " high, $2\frac{3}{16}$ " deep.

DYNAMIC TYPE EARPHONE AND MICROPHONE ASSEMBLY

- * For Inter-com Units
- * Code Practice Sets
- * P. A. Systems
- * Home Recordings
- * Mobile Equipment

COMPONENT PARTS!

This unit consists of a microphone handset including a dynamic mike (50 ohm voice coil) activated by a DPST "push-to-talk" switch conveniently mounted on the hand set for thumb control. The mouth piece is of flexible rubber, and the unit is completely waterproofed with oil impregnated cloth inside the mike grill. The head set is of high quality spring steel, fully adjustable, and covered with genuine leather. The earphones, (2), built on the principle of a P.M. dynamic speaker, have a moving voice coil wound to 50 ohms impedance, and are attached to mica diaphragms. The magnetic field is set up by a very high quality super-alloy electro magnet. The ear phones are 1 3/8" speakers solidly encased in black bakelite and equipped with sponge rubber cushions 3 3/16" diameter.

FOR "INTER-COM" UNITS, CODE PRACTICE SETS!

By using suitable matching transformers, such as our No. 5B5062, page 25, or with the small degree of amplification provided by the audio section of a radio or a 2 stage amplifier, these sets make excellent "inter-com" units. Phone and mike leads terminate in a triangular 5 prong unbreakable rubber plug with extremely heavy duty insulation, but these leads may be taken apart, thus making the phones and mike available for use as separate units. When used separately, the phones may be used as small power speakers in "inter-com" equipment for office or home, using standard inter-com circuit, but substituting a small 50 ohm impedance to grid transformer in place of the transformer shown in the regular circuit. The speakers may also be used as audible reproducers in midjet code practice oscillator sets.

FOR MOBILE EQUIPMENT, AMPLIFIERS!

The microphone portion, which is built on the same principle as the earphones, (50 ohms impedance) can be used to operate a relay or other external control circuits by means of one section of the dual DPST switch which has separate leads brought out. This type of unit is suggested for use on circuits to be operated during the time the mike is used only, such as completing plate supply circuits on mobile equipment. This would facilitate conservation of plate current during silent periods. The same type of circuit would obviate wear and tear on components in stationary A.C. amplifier systems where equipment is used for call purposes only, by closing the plate current supply instantly at the time the mike is to be used.

FOR P. A. SYSTEMS, HOME RECORDING!

The mike has sufficient output so that even at 50 ohms impedance it can be operated directly into the high input-mike channel of any standard P. A. amplifier.

By means of a suitable matching transformer such as our No. 5B5062, page 25, it will also operate into the phono channel of any amplifier or home radio set, making it very suitable as a home recording microphone.

MANY OTHER USES!

Each unit is equipped with a 37" cord and rubber receptacle to fit the 5 prong male plug on the head set and mike. The cord has 5 color coded wires and a clamp for panel mounting. This cord extension will facilitate disconnecting the entire unit at will. The service man and experimenter alike, will undoubtedly find many other uses for these marvelous little units which are being offered at but a small fraction of what they originally cost to build in large quantities!

RECHARGEABLE BATTERY AND FLASHLIGHT KIT

SOMETHING NEW AND UNUSUAL—LASTS A LIFETIME—FORMERLY AVAILABLE ONLY ON HIGH PRIORITY!

HOME KIT

A novel type of flashlight with rechargeable, storage type battery. Kit includes flashlight case with lamp, rechargeable flashlight battery, water dropper, battery wrench, and battery charger. The battery is spill proof and will fit any standard flashlight case. It is precision made for heavy duty commercial use and is carefully tested before shipment. The flashlight case is of a new design in special, tough plastic which is unaffected by wide temperature variations. Color: Grey. The battery charger quickly restores batteries to full power. It is a compact unit which plugs into 110/120 volt 60 cycle outlets, with an indicating lamp to show when battery is charging. This kit is extremely economical because the storage battery will outlast several hundred size D dry cells. It lasts for years and will give up to 1000 hours of Bright Light with proper care and periodic recharging.

C15715—Your Cost..... \$5.17

AUTOMOBILE KIT

Same as home kit, except that charger connects to auto or boat ignition system (6 volts). Indicator light shows when charger is "on." Does not interfere in any way with operation of car or boat. Kit includes flashlight case with lamp, rechargeable flashlight storage battery, auto charger and water bottle.

C15716—Your Cost..... \$4.52

Battery for above: fits standard flashlight case and takes place of two 1 1/2" size D dry cells.

Type FP and WP Compact Dry Electrolytics

These capacitors, long considered standard for metal encased units, are ideal for many types of service. Light in weight, compact and provided with a complete mounting feature, they save assembly space and time. Thousands of these units have given excellent service under extreme conditions of high altitudes and humidity.
